### PRISMA quarterly auction on 04 November 2019

#### **Important information regarding the capacity offer at the cross-border interconnection points Entry Bocholtz, Entry VIP Belgium-NCG and Exit VIP Germany-CH**

21/10/2019

**Fluxys TENP GmbH (Fluxys TENP) and Open Grid Europe GmbH (OGE) would hereby like to provide all interested parties with the following information related to the quarterly capacity auction on PRISMA to be held on 04 November 2019.**

As communicated on 03 June 2019, the final phase of the construction works for measure n°307-01 (“GDRM-Anlage Mittelbrunn”) in the framework of the Network Development Plan Gas 2016-2026 (NDP 2016) will be completed during summer 2020.

Based on the planned maintenance measure No. 21021949 published on October 21, 2019, the physical gas transfer between the TENP and MEGAL pipeline systems will be restricted from 01 April 2020 06:00 until 01 August 2020 06:00. As a consequence, part of the bFZK and FZK capacities at Entry Bocholtz, part of the FZK capacities at Exit Wallbach / VIP Germany-CH as well as FZK, bFZK and DZK capacities at Entry and Exit Eynatten / VIP Belgium-NCG will be impacted.

However, physical transport from the North entries of TENP will remain possible with interruptible access to the Virtual Trading Point. Therefore, during the quarterly capacity auction of 04 November, Fluxys TENP and OGE will offer DZK capacities between Entry Bocholtz and Exit VIP Germany-CH for Q2 2020 (transport period 01 April 2020 06:00 – 01 July 2020 06:00). This product enables firm transport for parties nominating in balance between Entry Bocholtz and Exit Wallbach / VIP Germany-CH. OGE and Fluxys TENP will both offer DZK capacities on Entry Bocholtz, Fluxys TENP will offer DZK exit capacities on VIP Germany-CH.

Interruptible capacities for the affected period will be offered anyway. Remaining available firm capacities will be offered in the respective monthly, daily and within-day auctions according to the PRISMA auction calendar.

For transport period 01 August 2020 06:00 – 01 October 2020 06:00, a maintenance planning is still under finalization. The details will be communicated as soon as they are final.

Fluxys TENP and OGE aim to minimize the impact of the described maintenance measures on the capacity offer as much as possible and apologize for any inconveniences caused. For finding suitable solutions and for any further questions related to these maintenance measures please feel free to contact Fluxys TENP and OGE.
