

Market Communication regarding maintenance periods in 2021

Swissgas AG in its role as Swiss Transmission System Operator informs herewith all market participants in Switzerland about the upcoming maintenance periods in 2021 with commercial impacts on swiss import capacity at the cross-border points in Oltingue (Ol), Passo Gries (PG) and Wallbach (Wb):

Maintenance on Transitgas-System 2021

- 2nd – 6th of August 2021*
Limitation of commercially available import capacity down to 80% in Wallbach
- 4th – 6th of August 2021*
Limitation of commercially available import capacity down to 89% in Oltingue
- 4th – 6th of August 2021*
Limitation of commercially available import capacity down to 40% in Passo Gries
- 4th – 13th of October 2021*
Limitation of commercially available import capacity down to 0% in Oltingue

The overall impact for the swiss security of supply due to above mentioned limitations are neglectable.

Maintenance on adjacent TSO's 2021

Maintenance on adjacent transmission systems (*France, Germany*) can lead to limitations (commercially / technically) that urges shippers to take measures and adjustments to their transmission routes.

Non-binding we call shippers to attention regarding the following maintenance periods on adjacent transmission systems (*for more detailed information please visit the websites of the respective transmission system operators*):

- There is still maintenance to be done on the transmissions systems TENP-MEGAL. Thus, from 06th of April until 30th of June 2021* limitations on FZK capacities in flow direction to Wallbach (*Forward Flow*) may occur. (<https://gasdata.tnp.gsmartsuite.com/sdp/Pages/Reports/CapacitiesFlows.aspx>)
- Due to maintenance the cross-border point Oltingue is not available in both flow directions (*Forward Flow / Reverse Flow*) from 1st until 22nd of October 2021* (<http://www.grtgaz.com/en/access-direct/customer/supplier-trader/works.html>)

Do not hesitate to contact us for further information.
